SOURCE TAGGING INNOVATIONS

DUAL TAG PRODUCTION RAMPED UP TO MEET GROWING DEMANDS FROM THE OTC AND HBA SUPPLY CHAIN

OTC/HBA supply chain target Dual Tag as means of relieving costs associated with maintaining dual inventories

TORONTO, Ontario. — February 8, 2006 — KMA Global Solutions, an industry leader in the development and manufacturing of EAS labels for the retail supply chain, today announced a manufacturing and marketing initiative designed to fulfill the rapidly growing demand for DUAL Tag products from vendors and packagers of OTC and HBA consumer products.

The patented KMA Dual Tag uniquely incorporates both acoustical magnetic (AM) and radio frequency (RF) sensors compatible with the two competing electronic article surveillance (EAS) theft prevention technologies, widely adopted throughout the retail sector. By using the KMA Dual Tag, OTC & HBA vendors are relieved of the necessity and cost of maintaining double inventories of finished packaged goods necessary to satisfy each of the competing EAS formats.

Jeff Reid, President of KMA Global Solutions says "the Dual Tag is a truly "universal" source tagging solution since it mutually satisfies the needs of all OTC & HBA supply chain stakeholders, including retailers, brand owners, manufacturers and packagers."

From a manufacturing perspective, KMA's Toronto facility is now in the final phases of testing newly installed machines dedicated exclusively to producing the innovative DUAL Tag products. Ramped up production of the DUAL Tag is also being supported by sales and marketing initiatives targeting the growing OTC and HBA retail sectors.

About KMA Global Solutions

Headquartered in Toronto, Canada, KMA Global Solutions is a privately held corporation with roots in the domestic and offshore soft goods manufacturing industry. A pioneer in the development of innovative, added value, source tagging solutions, KMA holds several patents for industry leading EAS products including the NexTag and the DualTag. With branch offices in Canada, the United States, Hong Kong and Taiwan, KMA is an authorized value added reseller for both Sensormatic and Checkpoint technologies.

At KMA, our Business Mission is to constantly reinforce our industry leadership as a preferred competitive supplier in the timely delivery of superior, cost effective, source tagging products - all the time, everytime.
